- Antonio Tajani, President of the European Parliament
- Nicola Zingaretti, President of the Region of Lazio

The inaugural Fondazione Appia Antica Forum will be held at the at the Sala Conferenze, Parco Regionale Dell’Appia Antica, Via Appia Antica 42, 00179 Rome, Italy on March 21st – 23rd, 2019

Fondazione Appia Antica Forum will establish itself as the annual premier event for sustainable urban development, nature as medicine and education. An extraordinary opportunity to learn about the most significant developments in sustainability and with renowned international scientists and professionals. The Forum is aimed at scientists, professionals, companies, government representatives, members of parliament, representatives of sustainable development and education and representatives of the financial industry that are interested in the advances of sustainability.

Inspired by the Appia Antica Regional Park, the only archeological and environmentally protected park where people live and work on a daily basis, Fondazione Appia Antica’s mission and vision is to support Parco Regionale Dell’Appia Antica and other urban developments that strive to follow Appia Antica Regional Park’s example.

Urban development is going through an extraordinary phase of transformation with important social reforms with the world about to enter a new energy area. The Appia Antica Regional Park can and will become the world model of the energy transition and sustainable urban development and education. Sustainable urban development and education are destined to attract huge investments and generate unprecedented socio-economic and cultural opportunities for all stakeholders involved.

The program and the speakers

In addition to the participation of Dr. Qing Li, the world's foremost authority in his field we expect, Minister Counsellor Fredrik Alfer, Embassy of Sweden in Rome, representatives from the cities of Milan, Assisi and Castel Gandolfo as well as scientists and government representatives from Taiwan, Norway, Italy, Spain, and the UK. The program will address issues related to

"Living in the Anthropocene – Forest Medicine and Biophilia" in the context of sustainable urban development and education.

LAGOM HOUSE – Main Sponsor

Sustainable urban development and education has long been a strategic interest for Lagom House and has dedicated its interest to support sustainable development and education and the efforts of Fondazione Appia Antica.
